Thermostat Mercury Recovery and Recycling: An Easy Way to be Green

Many states regulate the disposal of products that contain mercury. When it comes to thermostat recycling, two words sum it up: compliance and regulation. With the support of HVAC distributors, contractors, local governments and retailers acting as collection points, The Thermostat Recycling Corporation (TRC) recovered nearly one ton of mercury in 2010. Experts from the Thermostat Recycling Corporation will cover the basics of the program, legal aspects and compliance of recycling as well as green marketing. Being environmentally responsible just makes good sense; join us to see how easy recycling mercury-containing thermostats that are taken out of use really is.
