

With robust diagnostics and universal application, the Honeywell Hot Surface Ignition (HSI) Universal Integrated Furnace Control (UIFC) is the only model you need.

Honeywell offers universal compatibility by way of a complete set of wiring harnesses adapters to simplify installation. EnviraCOM™-enabled to work with remote monitoring and diagnostic systems, the Honeywell UIFC features innovative, robust diagnostics that make installation and troubleshooting a breeze.

Critical errors are immediately dialed out when connected to a Telephone Access Module and displayed on the touchscreen of the VisionPRO® IAQ. Able to replace most furnace controls and be applied to most heating and cooling single-stage appliances, Honeywell UIFCs are the only brand you need on your truck. Simplify your inventory with the universal choice — Honeywell Universal Integrated Furnace Controls.

HSI Universal Integrated Furnace Control

Save yourself headaches when trying to replace furnace controls with like models — carry Honeywell Universal Integrated Furnace Controls (UIFC) on your truck. Featuring universal compatibility and simplified installation by way of a complete set of wiring harnesses, having exactly what you need is always a breeze with the UIFC.

One Control Handles It All

Put an end to excessive inventory and searching for the right model on your truck — the keyed wire harnesses allows it to replace nearly all furnace controls and be applied to most heating and cooling single-stage appliances. Simply put, this is the only control you need for residential natural or liquid propane fueled furnaces.

Built-In EnviraCOM™ Communications

Honeywell Universal Integrated Furnace Controls are EnviraCOM™-enabled, so you can set up local or remote monitoring and diagnostic systems — perfect for selling service contracts. Because all Honeywell UIFCs feature EnviraCOM communications capabilities, you'll have your customers ready for remote services whether you're replacing old controls or installing new equipment like the VisionPRO™ IAQ, Telephone Access Module (TAM) or EnviraZONE™. If a critical alarm occurs, like a rollout switch alarm, the TAM will call out immediately to notify you of the problem and an error message will be displayed on the screen of the VisionPRO IAQ to notify you of the problem. Stay connected with Honeywell EnviraCOM communications.

Simplified Installation

While models from other brands have unique wiring terminals requiring a like for like replacement, Honeywell Universal Integrated Furnace Controls feature universal wiring harnesses that give you the flexibility you need while in the field and on the job. Wiring harnesses are included for simple replacement and installation, and LED indicators provide system status, performance and diagnostic information. Honeywell has also mounted the board into a plastic tray which results in an easier installation and added protection against dust and flexing of the board. It all adds up to an easy installation.

Proven Reliability

Because the UIFC is built by Honeywell, you know it's engineered for reliability and long-term performance. Safety and dependability are built into every Honeywell product.
