

Wireless FocusPRO® Thermostats Now Dual Fuel Enabled

Honeywell

With more heat pump and geothermal systems being installed today, the need for a compatible control has never been greater. Honeywell's new Wireless FocusPRO Thermostats are now able to control these systems – thanks to their new dual fuel capability. Not only does this allow you to meet the needs of more applications, it also provides for a quick and easy installation.

Key Benefits

- Eliminates the need for an external fossil fuel kit
- Eliminates the need to run wires to the Thermostat location
- Eliminates the need to run wires to the Wireless Outdoor Sensor
- Allows for additional droop and timer options – help reduce the amount of backup heat needed
- No balance point with geothermal systems

Look For the Sticker

You can tell which models have the dual fuel capability by looking for the sticker on the product packaging. The following is a list of part numbers that have been upgraded:

- YTH6320R1001
- YTH6320R1015
- YTH5320R1000
- YTH5320R1017
- TH6320R1004
- TH5320R1002
- THM5320R1000

New Kits Available

New kits are now also available, which include everything you need to set up a dual fuel system:

- YTH6320R1009 (Programmable Thermostat, Equipment Interface Module, Return Air Sensor, Wireless Outdoor Sensor)
- YTH5320R1008 (Non-Programmable Thermostat, Equipment Interface Module, Return Air Sensor, Wireless Outdoor Sensor)
