

Zoning Dampers

Honeywell

Honeywell dampers offer the highest quality workmanship and unparalleled performance. Every Honeywell damper is built for installation flexibility, reliability and reduced callbacks. The enhanced design provides longer and quieter operation over the life span of the damper. With over 100 size options in both rectangular and round configurations, Honeywell has a damper available for virtually every zoning application. Rounding out the portfolio are both barometric and modulating bypass damper models.

Zoning Dampers

SEE THE HONEYWELL DAMPER DIFFERENCE.

Unparalleled performance:

- **Reversible shaft**
 - Easily change the damper to power open/spring close for fresh air ventilation applications
- **Proven performance, tested at real-life extremes**
 - 75°–140° Fahrenheit
 - 20%–80% Humidity
 - +/- Dust (major noise contributor)
- **Gasket Seal**
 - Very low external leakage
 - Leak tested to less than 1%
- **Gears built with Dupont™ Kevlar® fiber**
 - Stronger drive gear, longer life, quieter operation
- **Range stops**
 - Provides easy field adjustments of damper blade positioning
- **2 wire dampers**
 - Easier/faster install time
 - Cannot mis-wire
 - No polarity-cannot miswire

Quality workmanship:

- **Power closed, spring open**
 - In the event of a power failure, damper will stay in the open position
- **Counter-rotation pin eliminates risk of incorrect motor positioning during replacement**
- **Reliable mechanical position indicator**
- **Clear labeling**
 - Clear open close and blade position indicator
- **Rigid spiral damper body**
 - ARD5-ARD12 built with 24 gauge G60 galvanized steel
 - ARD14-ARD20 built with 22 gauge G60 galvanized steel

Part Number	Size
ARD5	5" Round Damper
ARD6	6" Round Damper
ARD7	7" Round Damper
ARD8	8" Round Damper
ARD9	9" Round Damper
ARD10	10" Round Damper
ARD12	12" Round Damper
ARD14	14" Round Damper
ARD16	16" Round Damper
ARD18	18" Round Damper
ARD20	20" Round Damper
